Note...

Some of the references in this portfolio only have small pieces/bits and only smaller pieces can be made.

Whenever the customer chooses the silk, the studio immediately informs if it is a silk that exists in sufficient quantity for the desired piece.

Each type of silk has specific consistencies and ways of working that are different from each other; the Craft Studio informs that it is not possible to mix silks of different categories/types in the same piece to guarantee an excellent final result.

Crepe Silk...
